

INSPIRE CLASSIC 600

REAL  FLAME

INSPIRE CLASSIC 600

The Inspire Classic 600 is a perfect solution to fill an existing fireplace cavity. Designed using the popular Inspire functionality and features, in particular the repositioning of the fan motor to the rear of the unit for a quieter performance and with a slimmer trim providing a significantly larger viewing area to capture the flames. The option of the infill panel creates a clean finish to any cavity installation.

Keeping you warm

Operating on Natural Gas and LPG, the High Efficiency heater is equipped with the versatile power balanced flue technology, enabling installation of the fireplace to be straightforward. With a star rating up to 4.3 and maximised heating performance of 70m² the heater is designed to efficiently keep those winter nights at bay.

Australian Made

Australian Made in our Melbourne facility, the Inspire Classic 600 has two media options to choose from, the driftwood or the all new snowgum. The new Snowgum media draws inspiration from the Victoria Highlands, derived from natural elements capturing the red, white and brown colours tones from the acutal snowgum tree.

KEY SELLING FEATURES

NEW 600 SIZE

A compact Inspire version for a classic finish into your existing fireplace cavity.

MEDIA FUEL SET

2 fuel bed options. Driftwood or Snow Gum.

INFILL PANEL

Infill panel for a seamless finish into an existing fireplace.

Remote Control

Convenience of operation with a touch of a button.

CHARMING FLAME PATTERNS

New and improved burner for an unmatched flame pattern.

POWERFUL ROOM COVERAGE

Heats up room from 70m² with 4.6kW output to keep those winter chills away.

MULTIPLE FLUE INSTALLATION

with up to 8.5m flue: horizontal, vertical, or under the floor. Install 0-8.5m with the insulated balanced powerflue kit.

Quiet Fan

Developed with a quiet motor and fan.
