Kitchener

90cm Dual Fuel

When William Flavel invented 'The Kitchener' cooker in 1829, not only did he invent the world's first range cooker but the concept from which all modern Falcons have descended. 'The Kitchener' was heated by solid fuel, it was a revolution - it could boil, roast, bake and warm all from the same source of heat. It even provided the blueprint for the innovative cast-iron technology used by our sister company, AGA.

Over the last five generations, Falcon has evolved to become the company it is today - Europe's number one range cooker manufacturer. Every Falcon cooker is made in Royal Leamington Spa, Warwickshire, United Kingdom, and benefits from over 180 years of manufacturing experience. Although the technology has changed since then, the commitment to producing exceptionally engineered and beautifully designed upright cookers has not.

The Kitchener 90 dual fuel cooker is available in cream or black with chrome fittings. With two spacious electric fan forced ovens and a separate grill, there is plenty of room to cook for all the family. The dual fuel cooker has a five burner gas cooktop including a triple ring wok burner and heavy duty cast iron pan supports.

An AGA Company

FITTINGS AVAILABLE	CHROME ONLY

HANDY RACK

The Kitchener has a removable handy rack. Fitted in one of two positions on the inside of the oven door. Falcon's handy rack allows you to place dishes where they are easiest to tend and holds up to 5.5kg.

SIDE OPENING DOORS

The Kitchener cooker features side opening oven doors for your convenience. This allows easy access to the oven interior when cooking or cleaning.

COOK AND CLEAN OVEN LINERS

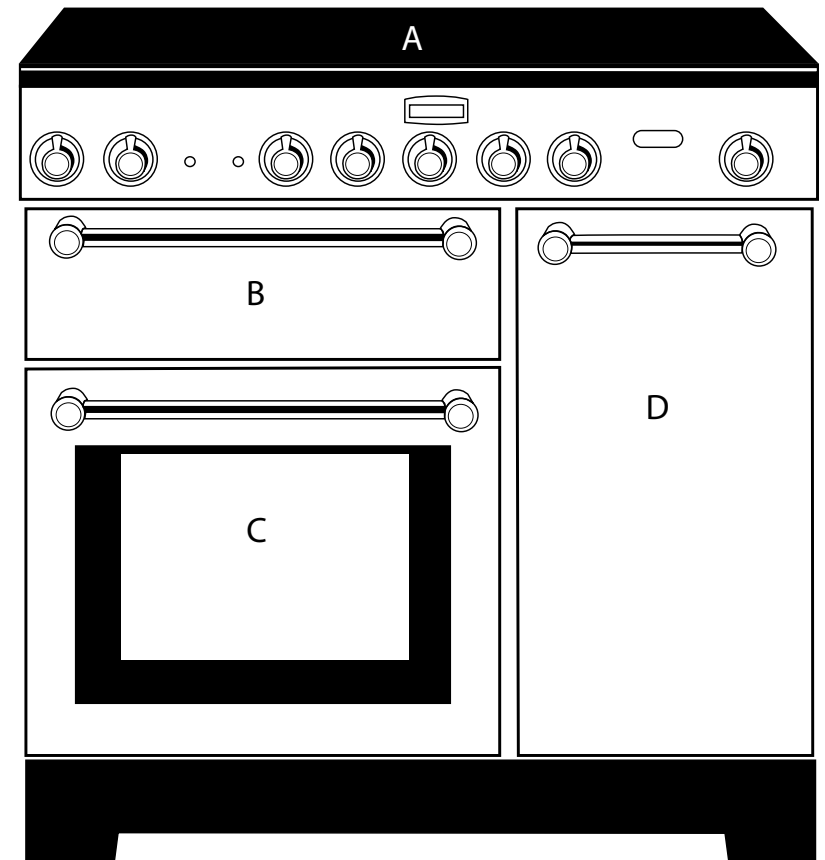

The Kitchener features removable cook and clean (self clean) liners on the sides of the left hand oven only. This reduces the amount of manual cleaning required.

FLAME FAILURE

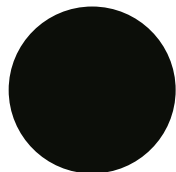

The flame failure device will shut off the gas supply if the flame is extinguished.
